

**Draft GDWG Agenda
for
2013 GSISC Meeting**

Aleksandar.Jelenak@noaa.gov

Four Themes

- Services
- New Data Sets
- Documentation
- Satellite Instrument Event Logs
- Input from GRWG is **crucial**

Services

- GPRC website review
- THREDDS servers status and configuration
 - Presenting information
 - Content of dataset pages
 - Unifying THREDDS URLs
 - Common configuration tool
 - Mirroring products
- Datacasting RSS protocol
 - Draft implementation proposal
- Cataloging and discovering GSICS data
- EUMETSAT's plotting web app
- Archiving product files

New Data Sets

- Defining netCDF content for:
 - Any planned products
 - Any intermediate/source data sets
- Calibration products developed outside of GSICS

Satellite Instrument Event Logs

- This must be joint WG session
- Keep presentations to minimum to enable discussion
- How much and where to standardize; what should be left to each GPRC as local customization
- I can talk about how to apply the abstract data model I presented a few months ago

Documentation

- GSICS official documentation (public and internal) technical reports, standards, etc.
 - Templates
 - Hosting
 - Identifier schema
- CF convention
 - Status of the standard name proposal
 - Future needs/requirements
- Storing richer metadata content in netCDF files
- Validating netCDF file metadata content
